

## The Water Cycle Chant

Ground water, runoff water, all drains back into the sea  
In a cycle, never ending giving life to you and me.

Evaporation from the Ocean  
Makes the clouds that fill the sky

Transpiration from the tree tops  
Joins the clouds as they go by

Ground water, runoff water all drains back into the sea  
In a cycle, never ending giving life to you and me.

Evaporation, Transpiration  
Form the big clouds that we get

Condensation causes rainfall  
Precipitation makes you wet.

Ground water, runoff water, all drains back into the sea  
In a cycle, never ending giving life to you and me.
